

Recombinant Human Reconstituted Myoglobin (rMyo-R)

Catalogue #: RP-7500

Primary Structure: Human myoglobin + heme

Source: E. coli

Purification Method: Ammonium sulfate precipitation

Storage Condition: -20 °C

Advantages: Contains no human or animal products

Uses: Calibrators and controls for immunoassays, western blot standards

Notes: Warm to room temperature and mix well before aliquoting. Heme was reconstituted during the purification process and non-incorporated heme was removed.
